# AlphaHound

## This is AlphaHound.

Rugged, reliable, and repairable, AlphaHound is the perfect addition to your radiation detection toolkit. Access multiple display modes, change user settings and functions all with a simple shake.

	AlphaHound	AlphaHound AB	AlphaHound AB+
Features			
Alpha			
Beta			
Alpha Beta Separation			
3 axis Alpha Beta Spectroscopy			
Display Modes	4	4	7

Introducing: AB+G

**The Ultimate Alpha/Beta/Gamma-Capable Radiation Detector.**

Capable of Alpha/Beta/Gamma separation all while keeping a compact form factor.

Available as a drop-in Gamma Mod kit for AlphaHound A, AB & AB+.

## **New features/specs:**

- Gamma Detection & Spectroscopy (5x5x25mm BGO Scintillator)
- Gamma Sensitivity: Cs-137 -  $1 \mu\text{Sv}/\text{h} = 35 \text{ cps}$
- >50keV Gamma Energy Detection
- Three independent buttons
- Speaker for Radiation Clicks and Alerts
- Alpha, beta & gamma separation
- Spectral dose rate compensation

**AlphaHound AB+G || Complete Separation!**

**Limited Time - \$529**

## Product Details

---

### Includes

AlphaHound

Boot Dust Cover/Alpha Shield

Wrist Strap

USB Type A to C Charging Cable

---

### Construction Materials

Chassis(SLM 316L Stainless Steel)

Dust Cover(SLS Nylon)

---

### Operating Ranges

0 to 6,000,000 CPM | >12.0MCPM Over Range (**Beta**)

0 to 1.2 MCPM | >3 MCPM Over Range (**Alpha**)

0 to TBD MCPM | >TBD MCPM Over Range (**Gamma(AB+G)**)

0 to 20,000 CPS | >50,000 CPS Over Range (**Alpha**)

0 to 100,000 CPS | >200,000 CPS Over Range (**Beta**)

-20°C to 45°C (-4°F to 113°F)

---

### Measuring Units

CPM

CPS

Rem/Sv(AB+G)

---

## Beta Energy Sensitivity

<50 KeV @ 25°C

---

## Modes

mode 1: Rolling Graph(All Models)

mode 2 : Sparkles(All Models)

mode 2 : Absolute/Total CPS/CPM(All Models)

mode 3 : AB Split Sparkles(AH+)

mode 4 : Basic AB 2D spectroscopy (AH+)

mode 5: Basic AB 3D spectroscopy (AH+)

mode 6 : Counts Per Hour(approximate radon levels)(All models)

mode 7 : User Settings(All models)

Mode 8 : Gamma Spectroscopy(AB+G)

Mode 9 : TBD(AB+G)

---

## Battery Type

Lithium, Rechargeable 350mAh(User Replaceable)

---

## Battery length on full charge

3-20hrs(Depending on display mode)

---

## Time to full charge

1.5hr

---

### **Display Type**

Digital 128X128 OLED (User Replaceable)

---

### **EMI/EMC Certification**

FCC, ISED, CE, UKCA

---

### **Country of Origin**

USA

---

### **Gamma Energy Sensitivity**

<50 KeV @ 25°C

### **Gamma Sensitivity & Energy Resolution**

42cps/uSv/hr(0.42cps/uRem/hr) - Cs137(AB+G)

15%+-1% - Cs137-662KeV(AB+G)

### **Rejection Ratios (AB+/AB+G)**

Alpha to Beta: < 5%

Beta to Alpha: < 0.001% @ < 20,000 CPS(1.2MCPM)

### **Scintillation Materials**

EJ-440(AlphaHound)

EJ-444(AlphaHound AB & AlphaHound AB+)

EJ-444 & BGO (AB+G)

### User Input

3 Axis Accelerometer(All Models)

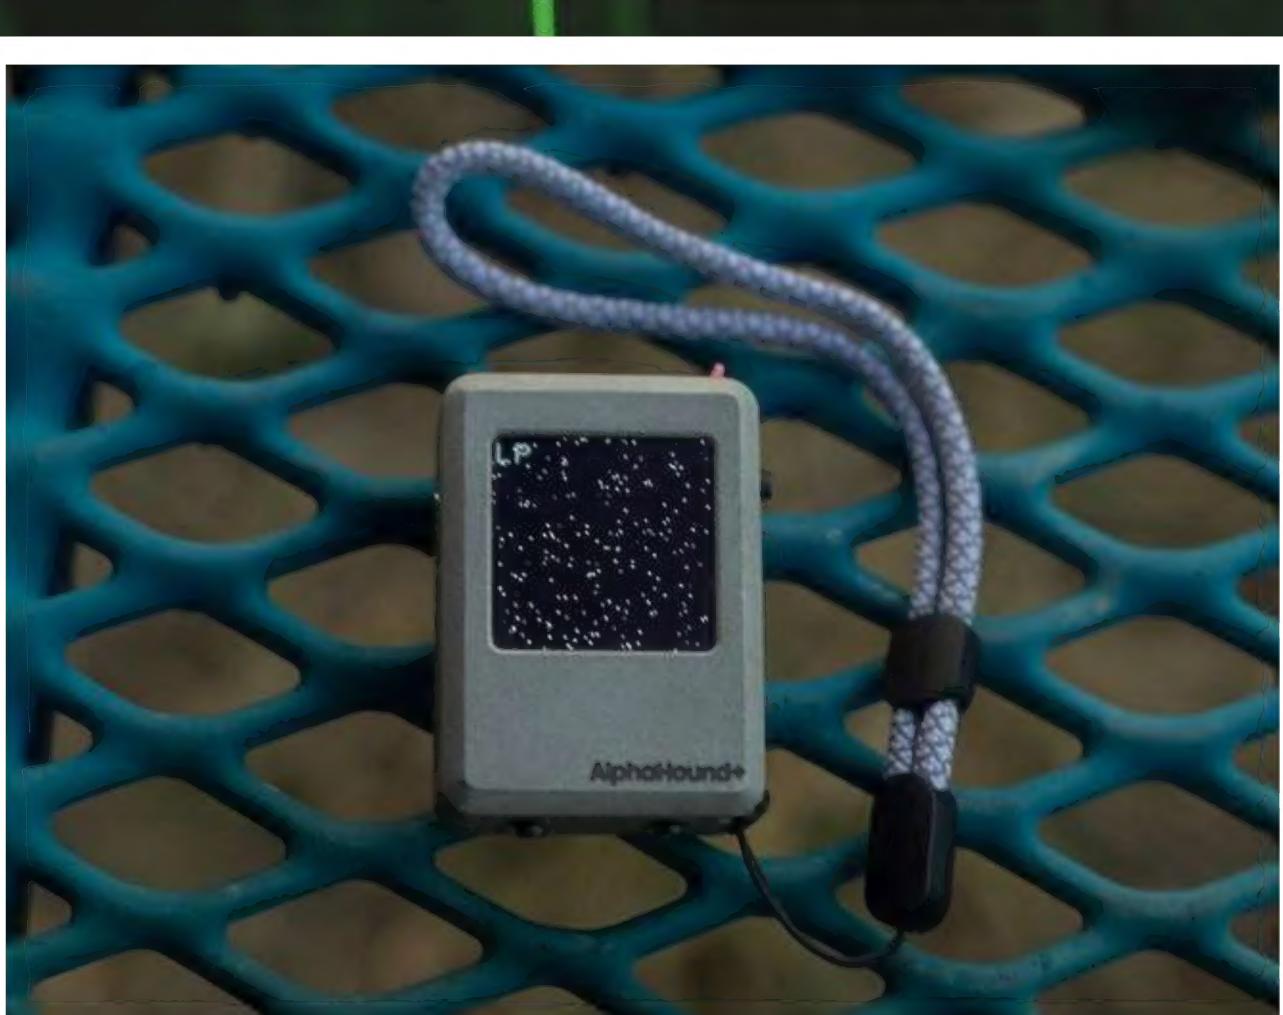

Soft tactile 3 button left right middle buttons(AB+G)

### Software

User updatable over USB C port with windows PC through AlphaHoundUpdater  
Software

Alpha/Beta detection in your pocket.

## Sensitive

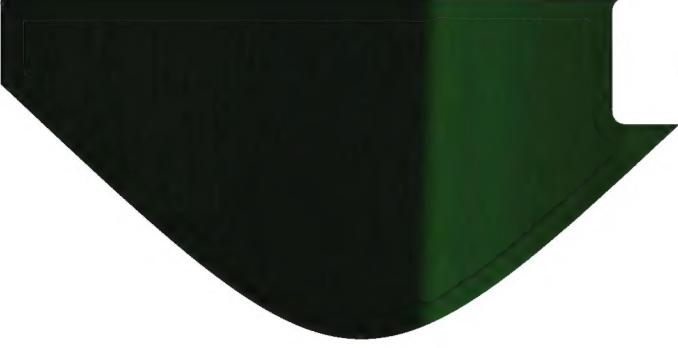

With 1.72 in<sup>2</sup> of open detection area, AlphaHound helps locate contamination with ease.

## Repairable

Designed to allow the user to fix the device using drop-in replacement parts.
